Esports vs Field Sports Industry Analysis

A Power BI dashboard comparing Revenue, Audience, Sponsorship, and In-game Sales across Esports and Field Sports industries.

Problem Statement

Sports and entertainment stakeholders need to understand how Esports compares to traditional Field Sports in terms of revenue streams, audience size, and sponsorship potential. This project answers:

1. Which industry generates more revenue?
2. Which industry has a larger audience?
3. How do sponsorship and in-game sales differ?
4. Which games/sports and regions drive the most revenue?

Dataset

- Source: Synthetic Excel dataset created for portfolio purposes, representing Esports and Field Sports industries.
- Key fields: Industry, Game/Sport, Year, Region, Category, Revenue, Audience, Sponsorship, In-Game Sales
- Data cleaning: Standardized industry names, corrected data types, and validated measures in Power BI

Tools Used

- Microsoft Excel (data cleaning)
- Microsoft Power BI (data modeling, DAX measures, interactive dashboard)

Dashboard Overview

Page 1: Overview

- KPI cards:
  - Esports Revenue, Esports Audience, Esports Sponsors.
  - Field sports Revenue, Field sports Audience, Field sports Sponsors.
- Revenue Comparison: Esports vs Field Sports
- Audience Comparison: Esports vs Field Sports
- Sponsorship Revenue Share by industry
- Slicers: Industry, Category, Region

Page 2: Detailed Analysis

- Revenue by Region
- Revenue Trend over the years
- In-Game Sales by Game/Sport
- Average Players Age

Key Insights

1. Higher Total Revenue
   - Industry: Field Sports
   - Revenue: $18.5 Bn

2. Highest Growth (Revenue) Trend
   - Industry: Field Sports
   - Growth: 5.7% in 2026 (1.6% more than 2025)

3. Larger Audience
   - Industry: Field Sports
   - Audience: 32.6 Bn

4. Higher Sponsorship Revenue
    - Industry: Field Sports
    - Sponsorship Amount: $47 Bn
    - Sponsorship Share (%): 79%

5. In-game Sales
    - Game/Sport: Football
    - Industry: Field Sports
    - Revenue: $11.5 Bn

6. Top Region by Revenue
    - Region: Asia-Pacific
    - Industry: Field Sports
    - Revenue: $6.7 Bn

7. Average Player Age
    - Esports (22.8)
    - Field sports (31.7)

Business Recommendations

1. **Prioritize investment in Field Sports, especially Football in Asia-Pacific**
   Field Sports dominates revenue ($18.5Bn), audience (32.6Bn), and sponsorship (79% share), with Football driving $11.5Bn in in-game sales and Asia-Pacific leading at $6.7Bn. Allocate marketing budgets, partnership deals, and product development toward Football-focused initiatives in APAC to capture the largest and fastest-growing revenue pool.

2. **Develop targeted Esports strategies around younger audiences and high-growth potential**
   Although smaller now, Esports has a much younger average player age (22.8 vs 31.7), indicating strong long-term engagement potential. Invest in youth-oriented content,

mobile-first experiences, and emerging titles to build brand loyalty early, positioning Esports as a growth engine for the next decade.

3. **Leverage sponsorship dominance in Field Sports while diversifying revenue streams** With 79% of sponsorship revenue coming from Field Sports, deepen relationships with top sponsors through multi-year deals and co-branded activations. Simultaneously, explore underutilized revenue streams in Esports (e.g., in-game purchases, digital merchandise) to reduce over-reliance on traditional sponsorship and balance the portfolio.

How to Use This Dashboard

1. Open the `.pbix` file in Power BI Desktop.
2. Use the slicers to filter by Industry, Category and Region.
3. Compare Esports and Field Sports using the visuals on Page 1.
4. Explore detailed breakdowns on Page 2.

Files in This Repository

- `Esports_vs_Field_Sports_Analysis.pbix` – Power BI dashboard file
- `Esports_vs_Field_Sports.xlsx` – Cleaned Excel dataset
- `README.md` – Project documentation

Next Steps

- Add more years or regions to the dataset
- Include additional metrics (e.g., profit margins, growth rates)
- Build a published Power BI service link for interactive sharing
